

## RODGERS CENTER FOR PLASTIC SURGERY HELPS YOU LOOK YOUR VERY BEST

### YOUR APPEARANCE SAYS A LOT ABOUT YOU.

You may have a charming personality or a kind heart, but it's your appearance that people inevitably notice first. Are you confident in the way you look? Whether you'd like to regain a more youthful appearance, correct a certain flaw, or have a tattoo removed, you want to be sure that you're receiving skilled, qualified care. At Rodgers Center for Plastic Surgery, you'll be treated by professionals using the most advanced technology available.

"We try to stay on the cutting edge of technology and procedures," explains Dr. Bret Rodgers, who has more than a decade of experience as a plastic surgeon, specializing in facial plastic and reconstructive surgery, head and neck surgery, and a variety of cosmetic procedures.

Rodgers Center offers a variety of laser surgeries. The V-Beam removes redness caused by rosacea, birth marks, and vascular damage such as spider veins without affecting the surrounding tissues. The CO<sub>2</sub>RE laser resurfaces skin to improve the appearance of wrinkles, sun damage, and age spots, and give the skin a smoother look and feel. If you've got tattoos you'd like to have removed, the PicoSure laser drastically lightens ink pigments. As a result, a patient may only need four to

five treatments, as opposed to 13 or 14 with other equipment.

Other services offered by Rodgers Center include IPL, or Intense Pulsed Light, for removing dark spots and unwanted hair, cosmetic procedures such as injectables and fillers, liposuction, and of course facial plastic surgery. All procedures are safe and effective and can be executed with precision control.

"We try to stay on the cutting edge of technology and procedures..."

In addition to providing these services, Dr. Rodgers and his staff are committed to serving their community. They participate in the Face to Face program, which offers pro bono facial plastic and reconstructive surgery to domestic violence survivors who have had injuries to their face, head, and neck by an intimate partner. They also offer treatment for breast cancer patients to repair tattooing from radiation, at no charge.

Located on N. Eagle Road near Chinden Blvd., Rodgers Center for Plastic Surgery is convenient to the communities of Boise, Eagle, Meridian, and is a short drive from other regions of the Treasure Valley.

No matter your age, you always want to look your best. Don't trust your appearance to just anyone. Visit the skilled professionals at Rodgers Center for Plastic Surgery to find out how they can help keep you looking your very best. ■
